Subject: Re: additional questions regarding Honolulu HCT financial plan

Yes, that is my guess, but there is one potential sticking point. I think the main point of interpretation will be whether to assign a Medium-Low or Low rating to the capital financial capacity/planning assumptions subfactor. To get a Medium-Low rating, they would need to access another \$535 million (10% of Project costs). I am assessing this risk but haven't come to a conclusion. It is a potential problem. Let me know if you need more information at this point and I will tell you what I am considering.
